Weekly Coal Production

Energy Information Administration
Washington, D.C.

Production for Week Ended:
June 2, 1984

Published:
June 8, 1984

Highlights

Production of bituminous coal and lignite in the week ended June 2, 1984, as estimated by the Energy Information Administration, was 16,873,000 short tons. This was a decrease of 2,248,000 short tons, or 11.8 percent from production in the previous week due to the Memorial Day holiday. Production in the corresponding week of 1983 was 13,103,000 short tons. Bituminous coal and lignite production from January 1 through June 2, 1984, totaled 378,068,000 short tons, 16.5 percent above production in the same period of 1983.

Production of Pennsylvania anthracite in the week ended June 2, 1984, as estimated by the Energy Information Administration, was 85,000 short tons, a decrease of 11,000 short tons or 11.5 percent from production in the previous week. Production in the corresponding week of 1983 was 78,000 short tons. Anthracite production from January 1 through June 2, 1984, totaled 1,898,000 short tons, 25.1 percent above production for the same period of 1983.

Energy Information Administration Weekly Coal Production

1 2 5 5

Weekly Coal Production provides timely information on coal: current statistics on the production of anthracite, bituminous coal, and lignite are provided each week; monthly and annual statistics on coal consumption, production, stocks, imports, and exports, and related supply and demand data are provided as they become available.

Weekly Coal Production is intended for use by the coal industry, the press, State and Federal Governments, policy makers, consumers, and analysts. Weekly coal production estimates are based on current trends in weekly rail carloadings of coal and current coal production trends as reported in *Coal Distribution* (Form EIA-6), monthly and quarterly coal production reports from State mine agencies, and *Coal Production Annual* (Form EIA-7a).

This report was prepared by the Energy Information Administration, the independent statistical and analytical agency within the Department of Energy. The information contained herein should not be construed as advocating or necessarily reflecting any policy position of the Department of Energy or any other organization.

This publication is available on an annual subscription basis from the Superintendent of Documents, U.S. Government Printing Office.
